Subject Index

A

acclimatization, to heat, 113
adjustment, of urine concentration, 559
adsorption, chloropicrin on carbon, 552
—mercury on cloth, 359
aerosols, of DOP, 307
—generation of, 825
—hydrogen chloride, 623
—impactor sampler, 262
—metal oxides, 825
—multicyclone samples of, 311
—sampling errors, 307
—spectrometer, 62
air, plutonium in, 333
air purifying respirator, ANSI standard, 92
air samples, for radon progeny, 165
alpha quartz, determination of, 711
—in dust, 711
aluminum smelting, heat stress at, 282
American Occupational Medical Association, address, 418
amino compounds, biologic monitoring, 426
amosite, surface energy, 345
analysis, see determination
ANSI, standards, 29
antimony, deposition in tissues, 292
—metabolism of, 292
arms, vibration effects, 613
asbestos, carcinoma from, 724
—collagen formation, 724
—control techniques, 799
—fibers in lungs, 148
—related redox factors, 724
—surface energetics of, 345
—trace metals in, 245
atomic absorption, detmn. of lead, 566
—detmn. of mercury, 571, 576
—for trace metals, 88
audiograms, reproducibility of, 366
audiometers, ANSI standard, 29
audiometry, sweep-frequency, 366
—test scheduling, 223

B

benezene extraction, of pitch volatiles, 718
benzo(α)pyrene, at coke ovens, 277
—determination of, 755
biochemical profiles, relation to fatigue, 525
biologic monitoring, amino compounds, 426
—cyanogenic agents, 426
—mercury in urine, 576
—nitro compounds, 426
blastogenisis, method of measuring, 207
—as toxicity index, 207
blastogenic, effects of uranium, 207
blood, chloropentafluoroethane, 269
—cyanogenic agents in, 426
—determination of lead in, 566, 793
—fluorocarbons in, 632
breakthrough, with carbon filters, 552
British National Coal Board, 1
British occupational hygiene, 381
bubble-suit, supplied-air, 41
burner, noise control, 107
byssinosis, respiratory protection, 503

C

cadmium, in coal, 93
cadmium oxide, aerosols, 825
calibration, cyclone samplers, 189
—of laser measurements, 327
cancer, from asbestos, 724
carbon disulfide, toxicology of, 55
carbon filters, chloropicrin adsorption, 552
carbon monoxide, personal sampler, 354
cardiac sensitization, by fluorocarbons, 632
cartridge, respirator, 391
—for solvent vapors, 391
cascade sieve, impactor, 262
cement, dermatitis from, 301
—metals in, 301
certification, of detector tubes, 438
chain saws, noise from, 152
chamber, animal exposure, 370
charcoal tubes, for furfural, 809
charge effect, in dust sampling, 603
chloromethyl ether, formation of, 419
chloropentafluoroethane, in blood, 269
chloropicrin, on carbon filters, 552
chromatography, amides in urine, 84
—toluene diisocyanate, 47
chromium, in cement, 301
—determination of, 229
—hexavalent in air, 229
chrysotile, surface energy, 345
cloth, adsorption of mercury, 359
coal dust, in miners' lungs, 479
—quartz determination in, 411
—size distribution, 443
coal mining, problems, 1
coal miners, use of respirators, 159, 546
coal mine, ventilation, 815
—single-use respirators, 546
coal tar pitch volatiles, at coke ovens, 277
coal workers pneumoconiosis, metals in coal, 93
cobalt, in cement, 301
collagen formation, from asbestos, 724
Collison nebulizer, 825
coke ovens, benzopyrene in air, 277
—coal tar pitch volatiles from, 277
compressors, noise control, 107
computer, for heat load, 75
concentric, aerosol spectrometer, 62
concrete, for neutron shielding, 234
consultants, industrial hygiene, 238, 662
control, of asbestos dust, 799
—of dust, 815
—of gear noise, 581
—of heat stress, 113
—of noise from gases, 107
conveyors, for asbestos, 799
cooling, of miners, 113
—with dry ice, 137
coordination, effects of fatigue, 525
—of eye and hand, 525
copper, in coal, 93
coprophagy, in laboratory animals, 741
—radionuclide retention, 741
cotton dust, respirators against, 503
counters, for particle size, 443
creatinine, adjustment for urine, 559
Cummings Memorial Lecture (1974), 589
cutting, polyvinylchloride film, 218
cyanogenic agents, monitoring for, 426
cyclone samples, calibration of, 189
—dual-inlet, 189
—effects of charging, 603
—effects of orientation, 598
—multiple unit, 311
—for particulates, 538
—penetration characteristics, 538
cyclotron, neutron shielding, 234

D

damping, of hand vibration, 613
decomposition, products of plastics, 654
dermatitis, from cement, 301
—role of trace metals, 301
detector tubes, interchangeability of pumps, 686
—for methyl isocyanate, 468
—NIOSH certification, 438
determination, of alpha quartz, 711
—of benzo(a)pyrene, 755
—of diethylamine, 476
—of furfural in air, 809
—of heavalent chromium, 229
—of lead in blood, 566
—of mercury, 571, 576
—of metals in coal, 93
—of methyl acetamide, 84
—of methy formamide, 84
—of methyl isocyanate, 468
—of pitch volatiles, 718
—of plutonium, 333
—of quartz, 311
—of toluene diisocyanate, 47
—of trace metals, 88, 245
dichlorodifluoromethane, ANSI standard, 29
diffusion, battery for aerosols, 808
dioctylphthate, sampling aerosols, 307
—see also DOP,
disposable, respirators, 546
distribution, antimony in tissues, 292
dosimeter, for radon progeny, 165
dry ice, cooling of workers, 137
dust, asbestos, 799
—in coal miners' lungs, 479
—cotton, 503
—in mines, 1, 71
—of pesticides, 374
—from pneumatic picks, 433
—sampling in mines, 71
—from sand blasting, 711
—ventilation of, 815
dust respirators, throw-away types, 546
dynamic, radiography, use of, 519

E

efficiency, of multicyclone samples, 311
—of respirator cartridges, 391
electromagnetic radiation, standards, 766
electromyography, in fatigue study, 525
electron microscopy, of membrane filter samples, 423
emissions, ferrous foundry, 452
energy, asbestos surface, 345
—measurement of lasers, 327
enzymes, in analysis, 20
—in solvent exposures, 21
evaporation rates, of solvents, 695
excreta, ingestion of, 741
exhalation time, respirator fatigue, 463
exhaustion, wearing respirators, 463
eposure chamber, for animals, 370
exposures, of harvesters, 374
—to pesticides, 374

F

fatigue, of repetitive work, 525
ferrous foundry, emmissions from, 452
ferruginous bodies, from asbestos, 724
fibers, by electron mincroscopy, 423
—exposure control, 799
—in lungs, 148
—transfer to EM grid, 423
filters, for asbestos, 799
—breakthrough of, 552
fluorides, cardiac sensitization, 632
—in urine, 99
Fluorocarbon 11, ANSI standard, 92
Fluorocarbon 12, ANSI standard, 29
Fluorocarbon 113, ANSI standard, 92
Fluorocarbon 115, in blood, 269
fluorocarbons, in blood, 269, 623
fluorometry, detmn. benzopyrene, 755
foot position, during lifting, 785
forces, in lifting, 785
formaldehyde, ANSI standard, 29
—chloromethyl ether from, 419
formation, of bis-chloromethyl ether, 419
foundry, emissions from, 452
free silica, in coal miners' lungs, 479
furfural, determination in air, 809

G

gas chromatography, for diethylamine, 476
gases, in mines, 1
—noise from, 107
gear, noise control, 107, 581
generator, metal oxide aerosols, 825
globe thermometer, evaluation of, 30
gold, mining, 113
graphite furnace, for lead detmn., 566
gravimetric sampling, dust in mines, 671

H

half-value thickness, of concrete shields, 234
hands, vibration effects, 613
hardrock mines, dust sampling in, 671
harvesters, pesticide exposure, 374
head, protection devices, 489
hearing risk, chain saw operators, 152
hearing tests, scheduling of, 223
heart rate, and work rate, 181
heat, radiant load, 75
—and work, 362
heat stress, in aluminum smelting, 282
—effect on productivity, 113
—evaluation of, 30
—indices, 113
—in laundries, 362
—in mining, 113
—relation to work load, 681
—use of WBGT, 282
helmets, safety research, 489
hepatotoxicity, of solvents, 21
n-heptane, toxicology of, 511
n-hexane, toxicology of, 511
hydrocarbons, toxicology of, 511
hydrogen chloride, chloromethyl ether from, 419
—toxicity of, 623
hydrogen sulfide, sampler, 730

I

Indusrtial Hygiene Consultants, list, 238,662
Industrial Medical Association, new name, 418
infrared, determination of quartz, 411
—radiation standards, 766
—spectroscopy in air, 735
ingestion, of chloropentafluorethane, 269
—of excreta, 741
inhalation, of chloropentafluoroethane, 269
impactor, cascade sieve, 262
irritation, by plastic decomposition products, 654
isocyanate, detector tube for, 468
iso-octane, toxicology of, 511

J

jute, thermal decomposition, 175

L

laboratory accreditation, lists, 53, 112, 268, 586
lasers, measuring energy, 327
—multiple pulsed, 252
—retinal effects, 252
—safety standards, 92, 766
laundries, heat-work stresses, 362
lead, in coal, 93
—determination in blood, 566, 793
lifting, foot position during, 785
—turning while, 785
limits, of heat stress, 113
liquid scintillation, counting, 333
liver, response test, 21
Lovelace nebulizer, 825
lungs, of coal miners, 479
—mineral fibers in, 148

M

manganese oxide, aerosols, 825
manual handling task, related to heat stress, 681
membership survey, of AIHA, 748
membrane filters, polyvinyl chloride, 229
—with electron miscroscope, 423
mercury, adsorption on cloth, 358
—determination in air, 571
—personal monitor, 571
—in urine, 257, 576
metabolic capacity, from heart rate, 181
metabolism, of antimony, 292
metal mines, dust sampling, 671
metal oxides, aerosol generation, 825
N-methylacetamide, determination, 84
—in urine, 84
methyl *n*-butyl ketone, hazard from, 206
N-methylformamide, determination, 84
—in urine, 84
methyl isocyanate, detector tube for, 468
microcooling, in hot mines, 113
microdetermination, lead in blood, 793
microwave, saftey standards, 766
mineral fiber, in lungs, 148
mining, gold, 113
—heat stress in, 113
—problems in, 1
—ventilation design, 815
modeling, ventilation design, 815
moisture, monitor, 40
monitor, for cyanogenic agents, 426
—for mercury vapor, 571
—for radon progeny, 165
motor coordination, effects of fatigue, 525
motors, noise control, 107
multicyclone, aerosol sampler, 311, 538
—for particulates, 538
muscles, in lifting, 785
—strength tests, 201

N

neoprene, thermal decomposition, 175
neutron, concrete shielding, 234
nickel, in cement, 301
—in coal, 93
nickel oxide, aerosols, 825
NIOSH certification, of detector tubes, 438
nitro compounds, biologic monitoring, 426
noise, British standards, 11
—chain-saws, 152
—control in gas plants, 107
—from gears, 581
—intermittent, 152
—in transit cars, 640
nonionizing radiation, standards, 766

O

optical, particle counters, 443
orientation, of cyclone samplers, 598
ornithine carbamyl transferase, test, 21
osmolality, adjustment for urine, 559
oxidative, thermal decomposition, 175

P

packaging film, thermal breakdown, 218
paper-in-a-cup, AA spectrophotometry, 88
particle, size measurements, 443
—spectrometer, 62
particle charge, effect on collection, 311
particulates, benzopyrene in, 755
—impactor samples, 262
—multicyclone samplers, 538
—pitch volatiles in, 718
—size-selective sampling, 538
—static charge on, 603
penetration of cyclone samplers, 598
n-pentane, toxicology of, 511
performance, relation to fatigue, 525
—and sleep loss, 13
personal monitors, for mercury vapor, 571
personal sampler, carbon monoxide, 354
—for diethylamine, 476
personnel, cooling, 137
pesticide, exposure of harvesters, 374
pitch volatiles, error in detmn., 718
—in particulates, 718
plasma, effects of sulfur dioxide, 288
plastics, decomposition products, 654
plutonium, by scintillation counting, 333
pneumatic jackpicks, exposure from, 433
pneumoconiosis, of coal miners, 479
polycarbonate, decomposition products, 654
polymers, thermal decomposition, 175
polystyrene, decomposition products, 654
polytetrafluoroethylene, exposures to, 99
polyurethane foam, thermal decomposition, 175
polyvinylchloride, membrane filters, 229
—thermal decomposition, 175
—thermal cutting, 218
—thermal sealing, 218
power, measurement of lasers, 327
preservation; of urine samples, 257
protective suit, supplied-air, 41
protoporphyrin, for lead in blood, 793
pulsation, of sampling flow, 311
pulsed lasers, retinal effects, 252
pumps, for detection tubes, 686

Q

quartz, analysis for, 411, 711
—in coal dust, 411
—in hardrock dust, 671
—determination by x-ray, 711

R

radiant heat, load computation, 75
radiation, analysis of scatter, 519
—monitoring standards, 766
—protective suit, 41
—scintillation counting, 333
radiography, dynamic, 519
—using secondary radiation, 519
radionuclide retention, in animals, 741
radon progeny, samples for, 165
redox factors, in asbestos injuries, 724
Renaud's phenomenon, 613
repetitive work, fatigue from, 525
respirable dust, quartz detmn., 411
—from sand blasting, 711
respirable mass, sampling, 189
respirators, byssinosis, 503
—cartridge efficiency, 391
—coal mines, 159
—cotton dust, 503
—effective of, 159
—exhalation time of, 463
—single-use, 546
—solvent vapor, 391
—wearer fatigue, 463
retinal effects, of lasers, 252

S

safety research, helmets, 489
sampler, for aerosols, 262
—for carbon monoxide, 354
—for diethylamine, 476
—dual-inlet cyclones, 189
—for hydrogen sulfide, 730
—multicyclone, 311, 538
—size-selective, 538
sampling, DOP aerosols, 307
—dust in metal mines, 671
—for hexavalent chromium, 229
—with membrane filters, 229
—for radon progeny, 165
—for respirable mass, 189
—for toluene diisocyanate, 47
sand blasting, dust from, 711
scatter, radiography tool, 519
scintillation counting, for plutonium, 333
scheduling, hearing tests, 223
screens, for asbestos, 799
screening, lead in blood, 793
sealing, polyvinylchloride film, 218
size distribution, of coal dust, 443
size-selective, sampling, 538, 671
sleep, and efficiency, 13
sleep-work, cycle of, 13
smelting, aluminum, 282
—heat stress at, 282
solvent, enzyme test of exposure, 21
—evaporation rates, 695
—liver response to, 21
—respirator efficiency for, 391
specific gravity, adjustments for urine, 559
spectrometer, aerosol, 62
spectrophotometry, atomic absorption, 88
spectroscopy, infrared, 735
stairclimbing, test of work capacity, 181
standards, for dust, 12
—for hand-arm vibration, 613
—for noise limits, 11
—for strength testing, 201
staitc charge, in dust sampling, 603
storage, of urine samples, 257
strength, static muscle, 201
subway trains, noise exposures, 640
suit, supplied-air, 41
S-sulfonate, changes in plasma, 288
sulfur dioxide, in air pollution, 589
—effect on plasma, 288
supplied-air, bubble suit, 41
surface, energy of asbestos, 345
sweep-frequency, audiometry, 366

T

tank respiraotrs, as exposure chambers, 370
tape sampler, for hydrogen sulfide, 730
TDI, determination of, 47
thermal cutting, of packaging film, 218
thermal degradation, of polymers, 175
thermal sealing, of packaging film, 218
thermoluminescent, dosimeter, 165
thermometers, globe, 30
tissue, antimony in, 292
—plutonium in, 333
toluene, ANSI standard, 29
toluene dissocyanate, determination of, 47
toxicity, of hydrogen chloride, 623
toxicity index, by blastogenic effects, 207
toxicology, of carbon disulfide, 55
—of volatile hydrocarbons, 511
trace impurities, by IR spectroscopy, 735
trace metals, in asbestos, 245
—in coal miners lungs, 479
—by AA spectrophotometry, 88
transit cars, noise exposures, 640
trichlorofluoromethane, ANSI standard, 92
trichloro trifluoroethane, ANSI standard, 92
tubes, charcoal, 809

U

ultraviolet, radiation standards, 766
uranium, blastogenic effects, 207
uranium miners, personal monitor, 165
uranium mines, ANSI standard, 29
uranyl nitrate, blastogenic effects, 207
urethan foam, thermal decomposition, 175
urinalysis, adjusted values, 559
urine, concentration adjustments, 559
—cyanogenic agents in, 426
—fluoride in, 99
—mercury in, 257, 576
—methylacetamide in, 84
—methylformamide in, 84
—of fluorocarbon workers, 99
—sample storage, 257

V

valves, noise control, 107
vibration, of hand and arm, 613
ventilation, for asbestos, 799
—for dust control, 815

W

WBGT, heat stress evaluation, 281, 362, 681
wet bulb-globe temperature, see WBGT
wet globe thermometer, heat evaluation, 362
work, and sleep loss, 13
work capacity, test for, 181
work load, relation to heat stress, 681
work stress, and heat exposure, 362
—in laundries, 362

X

X-ray diffraction, for quartz, 411, 711

Y

Yant Memorial Lecture (1971), 1
Yant Memorial Lecture (1972), 55
Yant Memorial Lecture (1973), 113
Yant Memorial Lecture (1974), 381

Z

zinc, in coal, 93
